Drone Alliance Europe Welcomes New Supporter Member Everdrone

Focus on Public Safety and Emergency Response Drone Missions Bolsters Alliance's Expertise and Advocacy

BRUSSELS – 1 July 2020 – [Drone Alliance Europe](#) (DAE) is pleased to announce that [Everdrone](#) has joined the Alliance as a Supporter Member. Everdrone exclusively focuses on providing drone solutions that support public safety and emergency response, allowing first responders to reduce response time and focus on their jobs on the ground. The company recently deployed a unique drone service where drones are being used to deliver defibrillators to real-world cardiac arrest situations. The service currently reaches 80,000 people in the Gothenburg area in Sweden.

“Drone Alliance Europe is pleased to welcome Everdrone to its membership. Everdrone’s work in the public safety space demonstrates the potential for drone technology to support life-saving missions in a variety of operating environments, including urban areas. The Alliance welcomes Everdrone’s unique experience and perspective, which will bolster our advocacy before policymakers as they advance a regulatory framework for the European drone market,” said DAE Executive Director Christoph Raab.

“As a leader in autonomous drone technology, our current and future operations very much depend on the implementation of appropriate regulations. By joining Drone Alliance Europe, we’re getting access to a network that will allow us to influence the regulatory development towards a risk-based and operation-centric approach that we are strong believers in,” said Everdrone CEO Mats Sällström.
